Welcome to the April 2011 edition of our CorasWorks newsletter. Now that we have April Fools' Day, World Health Day, and Tax Day (U.S.) behind us, we can concentrate on the really important things in April- like webcasts, product releases, and career opportunities. Read below for more detail on April happenings at CorasWorks.

4/28 Webcast:**Product Change Request Management**[learn more](#)**take a tour of our Project Portfolio Management Solution**[click here](#)**News**

CorasWorks is Hiring - Know any motivated, creative, and passionate people who would like to become CorasWorkers? Check out our available openings on our [Careers page](#).

Webcast: Product Change Request Management - Join us for a webcast on Thursday, April 28, to learn more about using CorasWorks Cim 2.0 to manage your Product Change Request Management process. [Click here for webcast details](#).

CorasWorks v11.1 - A new version of our award-winning solution platform is now available. CorasWorks v11.1 is ready for download by existing PASM customers. Visit [MyPlace](#) to download it today.

PMXPO - CorasWorks is pleased to announce we are participating in PMXPO. PMXPO is a virtual project management trade show sponsored by Ganttthead.com. Come by and visit us at the CorasWorks virtual booth. [Register here](#).

Blogs

Social Business Collaboration Meets SharePoint 2010 Intranet - Want a great Intranet on SP2010? In this post, William links to three short videos that give you a taste of the new collaborative experience with Cim on SP2010. It is all about greater visibility, interactivity, engagement, and convenience. See how the new Cim Business Activity Stream eliminates navigation and makes work a snap. [Read more](#).

Knowledge Pool: Easier Collaboration, Better Knowledge - This post from William contains a set of four brief videos that show you how users share, use, and enhance information in a Knowledge community. The videos and the article highlight how, through using Cim, people are able to work from any sites in SharePoint and collaborate as part of a "community" without having to navigate to somewhere else. [Read more](#)

Rapid Solution Design Using CorasWorks v11 - In this recent post from our From The Field blog, CorasWorks Solution Consultant Art Gelwicks describes how to use CorasWorks v11 to easily create a SharePoint-based scheduling tool to track and maintain upcoming events. [Read more](#).
