community.corasworks.net

The last few weeks have been very busy with the SharePoint 2009 Conference in Las Vegas, the unveiling of SharePoint 2010, and a flurry of CW product releases, press releases, information and partnership announcements. Here are the highlights.

News

- **Workplace Suite with No License Management – Now the default edition** – Version 10.2 of the Workplace Suite included License Management. Given the very broad types of infrastructures deployed by our customers, we've found the level of effort for a subset of you and CorasWorks to be overly burdensome. Your success is the most important thing to us so we have released a "non-license-management" version of the product. Going forward, this is the default version. If you aren't having any issues, you don't need to do anything. If you have had any issues with license management, you can download this via [My Place](#). Support will be available if you have any questions.
- **CorasWorks and Microsoft to Present Joint Webcast on SharePoint for the Web** – Sign up for this November 18th webcast to see how CorasWorks is empowering organizations to leverage SharePoint for web facing applications. [Click here to read more](#).
- **CorasWorks Releases Products for SP2010** – At the SharePoint Conference last month we announced the release of the Workplace Suite and Toolset for SP2010. These SP2010 versions are now available to CorasWorks customers and partners running Beta 1. When SP2010 goes Beta 2 (public beta) in November or December, we'll have those versions available also so you can get going. We'll also have apps in the App Store running on SP2010 Beta 2.
- **CorasWorks and Fpweb.net Partner to Take CW to the Cloud** – We have partnered with Fpweb.net to make the full CorasWorks app platform available in the Cloud. This is an exciting step for us as it opens up an entirely new market. It also provides a way for our on-premise customers to build Extranets/Communities in the Cloud – connected to their Intranets on premise. (also see [Fpweb.net release](#))
- **ISV Product Integration Announcements** – In September we announced product integration with **Synergy** for Replication ([see their release](#)). This week we announced a technical partnership with **AvePoint** covering their full range of infrastructure management tools based upon their DocAve Software Platform ([see their release](#)). These partnerships will help insure that the CorasWorks app platform is integrated with these leading infrastructure providers and capabilities.

Community Highlights

Apps

- **CorasWorks Apps - The Zen of SP2010** – This blog provides a link to a 5 minute video showing CorasWorks apps running on SP2010.
- **Project Portfolio Management Web Cast Video by CorasWorks** – CorasWorks PPM has really hit a hot button with customers. In case you missed the web cast last week, here it is. It provides an overview of PPM and a 20 minute demonstration, plus, responses to lots of questions. [Download PPM via the App Store](#) and get started.
- **Document Set Approval (by R3 Business Solutions)** – Document Sets are a new feature in SP2010. But, don't wait until next summer to have them. You can use this app from R3 to start working with sets of documents now. Manage documents as a group. Review, approve, email and comment.

Resources

- **Introductory Tutorials for Workplace Suite v10 Builders** – We've added a new Resource that provides a structured set of tutorials for using the Workplace Suite v10. It starts with 5 basic intro tutorials (about 3 minutes each). Then wraps up with a tutorial of building an app from scratch (19 minutes).

Blogs

- **CorasWorks App Platform in the Cloud (William's)** – This article provides more info on the offering with Fpweb. It talks about the offering, how we leverage the Fpweb.net virtualized cloud offering, and how this offering competes in the emerging App Platform as a Service market against other SAAS vendors.
- **Big Themes of SP2010 from Conference (William's)** – In this article, William calls out 6 big themes from the conference and provides his take on what they will really mean to us.
- **Useful Lists for SP2010 (Adam's blog on the web)** – In Adam's personal blog on the web he lists [the site templates in SP2010 and some of the new ones from CorasWorks that will be available with Beta 2 in November](#). He also [lists the list templates in SP2010](#). And, he [lists useful links to SP2010 resources](#).
